

VCMarker™

by Boeckeler®

Quickly and easily connects to most videoconferencing systems!

Color Annotation for Set-top Videoconferencing

Now, even budget videoconferencing systems can utilize the communication power of video marking found in VCMarker. Only video marking gives you the power to consistently focus a viewer's attention where you need it to make your point. VCMarker can be integrated into most set-top videoconferencing systems for very little expense. Then, see how much easier it becomes to communicate your ideas while in conference.

COST EFFECTIVE

For a fraction of the cost of your videoconferencing system, the VCMarker more than doubles its communication effectiveness. That translates to shorter conferences, freeing up valuable time.

EASY TO USE

The digital tablet and simple template makes marking intuitive. Most users can pick it up and use it without instruction. All commands are activated with a single click of the pen.

SIMPLE TEMPLATE

To be really effective, the control icons on a digital tablet template must be large enough to be easily selected. They also need to be organized logically to allow the user to locate them quickly enough to make their point while the opportunity is present. The included tablet and template fulfills all these needs. It also offers a compact drawing area.

BOTH LOCATIONS CAN MARK AND VIEW

A unique loopback technology allows both locations to view the markings made from the opposite location.

MULTI-PURPOSE

Two inputs allow VCMarker to be multi-purposed: videoconferencing, boardrooms, presentations, distance learning, etc. It's like getting two video markers for the price of one.

VCMarker Model MK-3

ENHANCE COMMUNICATION.
POINT OUT KEY DETAILS.
CLARIFY COMPLEX IMAGES.
DIRECT VIEWER ATTENTION.

SEVEN DIFFERENT COLORS
ENSURE THAT MARKINGS
CONTRAST WELL AND ARE EASILY
VIEWABLE OVER THE IMAGE.

EACH END OF
THE CONFERENCE
CAN SELECT A
UNIQUE COLOR FOR
THEIR MARKINGS,
KEEPING CLEAR
WHICH END
THE MARKINGS
ORIGINATE FROM.

CONNECTING A VCMARKER
AT BOTH ENDS OF A
VIDEOCONFERENCE ALLOWS
EACH LOCATION TO VIEW AND
MARK OVER ANY IMAGES BEING
DISPLAYED.

VCMARKER'S SIMPLE CONTROLS, AVAILABLE ON THE TABLET TEMPLATE, MAKE MARKING EASY FOR EVERYONE INVOLVED IN THE CONFERENCE.

VCMarker

MODEL MK-3

PRODUCT DESCRIPTION

VCMarker provides live video sketching over video or on a white board. VCMarker also functions as a two-input video switcher.

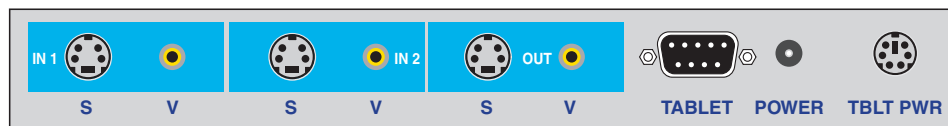

APPLICATIONS

- ◆ Point-to-point videoconferencing annotation
- ◆ Business and classroom presentations
- ◆ Video or whiteboard drawings
- ◆ Video switching
- ◆ General video annotating
- ◆ Distance learning

FEATURES

- ◆ 2 composite and 2 S-video inputs
- ◆ 1 composite and 1 S-video output
- ◆ 3 sketching modes: Input 1, Input 2, or Backgrounds
- ◆ Useful stamp shapes include: X, O, arrows, checkmark, rectangles and a circle
- ◆ Backgrounds: Grid, 2 coordinate axis and 3 coordinate axis
- ◆ 7 pen colors and 3 pen sizes
- ◆ Ability to free-run or stand alone video sketch pad
- ◆ Synchronizing TBC with input freeze on Input 2
- ◆ Output is genlocked to Input 1
- ◆ Quality serial tablet with template
- ◆ Lightweight, rugged construction
- ◆ One-year warranty
